Resumen

Index Terms

I. INTRODUCCIÓN

This is the introduction section. The IEEEtran class with the `onecolumn` option produces a document with single-column layout throughout, including the abstract, keywords, and all sections. This format is particularly useful for:

- Draft versions for review
- Technical reports
- Theses and dissertations
- Documents that require wider equations or figures

II. SUBSISTEMA 1

III. SUBSISTEMA 2

IV. CONCLUSIONES

This template provides a complete starting point for single-column IEEE documents. The `onecolumn` option in the IEEEtran class creates a professional-looking document suitable for drafts, reports, and other technical writing needs.
